

## ***Research 101: Online Modules Providing an Introduction to Research***

Research 101 is a set of modules designed to introduce trainees at a variety of levels to multiple topics that are relevant to the conduct of research, including:

- Introduction to research
- Aligning expectations
- Identifying a research mentor and a research project
- Study design and data analysis basics
- Submitting an Institutional Review Board (IRB) protocol
- Conducting a literature search
- Introduction to human subjects research and protections
- Presenting our research
- Introduction to team science
- Transparency, rigor, and reproducibility in research
- Evaluating the literature and presenting a journal club
- Effective writing for publication
- NIH grant basics

The modules are free and offered asynchronously, so learners may participate at their own pace. Contact Anna Johns at [anna.johns@uc.edu](mailto:anna.johns@uc.edu) to register.
